It's the "Baby" hosting package you need, so click on the Order Now button as in the above example.

The Baby hosting package gives you everything you'll need including Unlimited disc space, Unlimited bandwidth and unlimited domains.

So you can have as many sites as you want and not worry about having too many visitors using your limited bandwidth as you would with other hosting.

Next you'll see the screen above. At this point:

- If you don't already have a domain name for your site, you can register one with Hostgator for \$15 for the year. Simply type it into the box as highlighted above. You may have to try a few but the screen will show if your choice is available or not.
- If you already have a domain name you just tick the box "I will use my existing domain" and follow the directions after that.

NOTE: Your domain name is just like <http://www.genuineincomestreams.com/> in the example picture below, it's what is typed in to get to your site.

Just tick your choice as on the screen above. (.com .net .org) Always grab the .com if possible.

Then click on Continue.

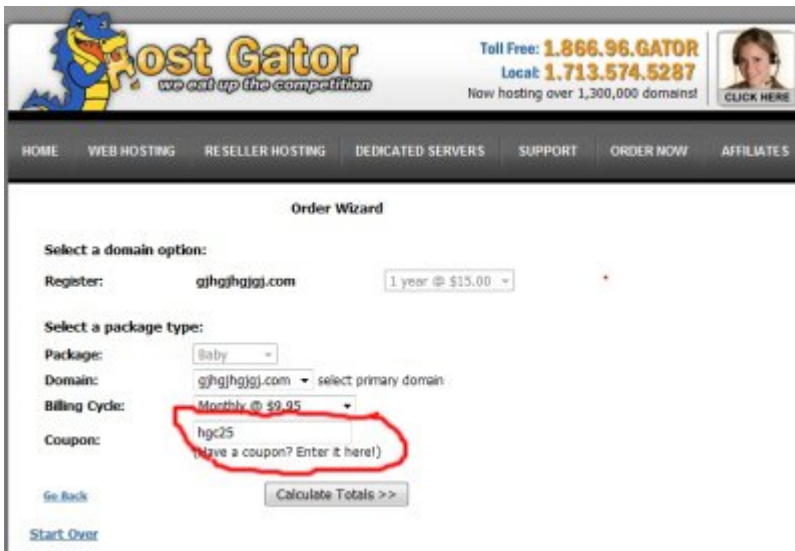

The screenshot shows the Host Gator Order Wizard interface. At the top, there is a navigation bar with links for HOME, WEB HOSTING, RESELLER HOSTING, DEDICATED SERVERS, SUPPORT, ORDER NOW, and AFFILIATES. The main content area is titled "Order Wizard" and contains the following fields:

- Select a domain option:**
  - Register:
- Select a package type:**
  - Package:
  - Domain:  select primary domain
  - Billing Cycle:
  - Coupon:

At the bottom of the form, there are two buttons: "Go Back" and "Calculate Totals >>". A "Start Over" link is also present at the bottom left.

You'll then see the screen above.

This screenshot is identical to the previous one, but with the coupon code "hgc25" entered into the "Coupon" field. The "Coupon" field and its content are circled in red.

Type this code: **hgc25** into the box for a \$9.94 discount. As in the above example.
